

Electric power supply from sea wave

Background of the Invention

Earth is dying. We need new energy.

Brief Summary of the Invention

This Invention is how to change power of sea wave to electricity

Brief Description of the Several Views of the Drawing

Fig.1 is when sea wave is down

Fig.2 is when sea wave is up.

Fig.3 is all system.

Detailed Description of the Invention

This Invention is how to raise seawater to pool on mountain. That is dam. Electric power generating system is as same as a waterpower station
